PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building production AWS data pipelines, medallion lakehouse architectures, and audit-ready ETL workflows. Proficient in Python, SQL, AWS Glue, S3, Lambda, Step Functions, and Kinesis. Strong focus on data quality gates, schema enforcement, lineage tracking, and deterministic transforms that turn raw sources into trusted, analytics-ready datasets.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark

AWS Data Services: S3, Glue, Lambda, Step Functions, Kinesis, EC2, IAM

Data Engineering: ETL/ELT, medallion architecture, incremental loads, data lakes, schema enforcement

Data Quality & Governance: Automated validation checks, row-count assertions, null thresholds, pipeline observability

Orchestration: Apache Airflow, scheduled workflows, retry logic, alerting

Tools: Git, Docker, Grafana, OpenLineage concepts, Deequ-style validation patterns

---

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Designed and built production data pipelines on AWS using S3, Glue, Lambda, and Step Functions for batch and streaming ingestion across APIs, documents, and relational sources.
- Implemented medallion-style staging, transformation, and curated layers with reproducible, deterministic transforms and version-controlled pipeline code.
- Built data quality gates at ingestion and transformation stages including schema validation, row-count checks, and anomaly alerting reducing silent failures by 90%.
- Developed Python and SQL ETL jobs processing 5M+ records daily with audit-friendly logging and end-to-end pipeline lineage documentation.
- Orchestrated workflows with Apache Airflow including dependency management, retries, SLA-based alerting, and production monitoring.
- Collaborated with analytics and product teams to deliver governed, agent-ready datasets with clear metadata and business context.
- Optimized AWS storage and compute costs through S3 lifecycle policies, right-sized Glue jobs, and incremental load patterns.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed Python and SQL ETL scripts to ingest and normalize data from REST APIs, CSV files, and PostgreSQL databases.
- Enforced schema consistency and data validation rules for downstream analytics and reporting workloads.
- Maintained Git-based version control with branching, pull requests, and peer code reviews.
- Supported data pipeline documentation and runbooks for reproducibility and team knowledge sharing.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

AWS Lakehouse Pipeline: End-to-end ingestion and ETL pipeline using S3, Glue, Lambda, and Airflow with automated quality gates and lineage tracking.

API Data Ingestion Framework: Python-based framework for multi-source API ingestion with schema enforcement, validation, and S3 staging for analytics workloads.
