PROFESSIONAL SUMMARY

Data Engineer with 2+ years of Python programming experience building efficient, reusable data pipelines using PySpark for large-scale transformations. Strong SQL skills with hands-on experience in Snowflake, Databricks, Azure Blob Storage, and AWS. Experienced in enterprise data platform development, requirements gathering with business stakeholders, data quality assurance, and delivering reliable pipeline solutions with advanced analytical and problem-solving capabilities.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark

Data Platforms: Snowflake, Databricks, Azure Blob Storage, AWS S3, Redshift

Data Engineering: ETL/ELT pipelines, data transformations, enterprise data warehouse, reusable pipeline code

Cloud: AWS (S3, Glue, Lambda), Azure (Data Factory, Data Lake), GCP BigQuery (exposure)

Practices: Code quality, automation, performance optimization, documentation, agile delivery

Tools: Git, Airflow, Docker, Linux shell scripting

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Designed, built, and maintained efficient, reusable Python and PySpark data pipelines processing 5M+ records across enterprise data platforms.
- Developed PySpark jobs on AWS Glue and Databricks-compatible workflows for large-scale data transformations and warehouse loading.
- Built Snowflake and Redshift data models with optimized SQL queries supporting analytics and business reporting workloads.
- Integrated Azure Blob Storage and AWS S3 ingestion layers with schema validation and incremental load patterns.
- Gathered requirements from analytics and product stakeholders and translated them into scalable pipeline solutions.
- Identified pipeline performance issues and implemented optimizations reducing batch processing time by 40%.
- Maintained code quality, organization, and automation standards with Git-based reviews and documented data processes.
- Ensured best performance and data quality through validation checks, monitoring, and proactive issue resolution.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed Python data transformation scripts using Pandas and SQL for multi-source ETL workflows.
- Built PostgreSQL and MySQL pipelines with indexing and query tuning for analytics workloads.
- Collaborated with business teams to understand data requirements and deliver reporting datasets.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Databricks Fundamentals (in progress)

KEY PROJECTS

Enterprise PySpark Pipeline: Reusable ETL framework on AWS Glue/Databricks loading Snowflake marts with automated quality gates.

Cloud Storage Integration: Multi-cloud ingestion from Azure Blob and AWS S3 with PySpark transformations and SQL modeling.
