---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience designing and implementing scalable data solutions spanning streaming, data lakes, and analytics platforms. Proficient in Python, SQL, Snowflake, Databricks, and AWS with hands-on experience building ETL/ELT pipelines, medallion-layered data structures, and metadata-driven data frameworks. Strong collaborator with experience leading data project workstreams and delivering production-grade solutions with data quality, monitoring, and governance best practices.

TECHNICAL SKILLS

Languages: Python, SQL, Java, PySpark, Scala (familiar)

Data Platforms: Snowflake, Databricks, AWS (S3, Glue, Redshift), Azure Data Factory

Data Engineering: ETL/ELT, Medallion Architecture, Apache Airflow, Apache Kafka, Data Modeling

Databases: Snowflake, PostgreSQL, MySQL, Amazon Redshift, MongoDB

Practices: Agile/Scrum, Git, CI/CD, Data Quality & Monitoring, Solution Documentation

Tools: Docker, Jenkins, Grafana, Power BI

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- • Designed and implemented tailored data solutions from streaming ingestion to data lake and analytics layers using AWS, PySpark, and Snowflake-compatible patterns.
- • Developed and maintained ETL/ELT pipelines, queries, and transformations following agreed design patterns and metadata-driven pipeline frameworks.
- • Implemented medallion-layered data structures (Bronze/Silver/Gold) with reusable components leveraged across multiple data products and domains.
- • Built production Apache Airflow DAGs orchestrating 25+ end-to-end data workflows with dependency management, retries, and alerting.
- • Onboarded new data sources, mapped source data to target models, and applied data quality and monitoring rules reducing silent failures by 90%.
- • Collaborated across diverse technical stacks including AWS Glue, Databricks notebooks, and Redshift for batch and incremental load patterns.
- • Led small data project workstreams mentoring junior engineers on pipeline development, code reviews, and Agile sprint ceremonies.
- • Generated solution documentation including data flow diagrams, schema designs, and logical system views for cross-functional stakeholders.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- • Developed Python, Java, and SQL data transformation scripts moving solutions into production with focus on performance and scalability.
- • Designed and deployed PostgreSQL databases and data stores supporting organizational analytics requirements.
- • Participated in daily standups, sprint ceremonies, and ad hoc working sessions delivering reliable data integrations.
- • Demonstrated strong written and verbal communication skills presenting technical concepts to business stakeholders.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Databricks Fundamentals (in progress)

KEY PROJECTS

Medallion Data Lake Platform: End-to-end pipeline using Kafka, Airflow, PySpark, and S3 with Bronze/Silver/Gold layers and automated data quality monitoring.

Snowflake-Style Warehouse Migration: Schema redesign and ETL pipeline migration project improving query performance by 75% and enabling self-service analytics.
