---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building scalable ETL/ELT pipelines, real-time streaming systems, and cloud data infrastructure on AWS. Proficient in Python, SQL, PySpark, Apache Airflow, Kafka, and Amazon Redshift. Proven track record delivering batch and incremental load patterns, automated data validation, and Redshift performance optimization for analytics and BI reporting.

TECHNICAL SKILLS

Languages & Frameworks: Python, SQL, PySpark, Java

Data Engineering: ETL/ELT, Apache Airflow, Apache Kafka, Apache Spark, Data Modeling, Data Quality Validation

Cloud & Infrastructure: AWS (S3, Glue, Lambda, EC2, Redshift), Git, CI/CD

Databases: Amazon Redshift, PostgreSQL, MySQL, MongoDB

Orchestration & Streaming: Airflow DAGs, Kafka producers/consumers, batch and real-time pipelines

Tools: Grafana, Power BI, Docker, Jenkins

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Built and maintained 25+ production Apache Airflow DAGs orchestrating end-to-end data workflows with dependency management, retries, and alerting for production pipelines.
- Developed scalable ETL/ELT pipelines on AWS using S3, AWS Glue, and PySpark for batch and incremental load patterns supporting BI reporting and application data needs.
- Implemented real-time data ingestion pipelines using Apache Kafka with low-latency, fault-tolerant consumers and dead-letter queue handling for critical business workflows.
- Administered and optimized Amazon Redshift clusters including distribution key design, sort keys, vacuum operations, and query optimization reducing report runtime by 75%.
- Built automated data validation and quality checks within pipelines including row count assertions, null thresholds, and schema validation reducing silent data failures by 90%.
- Managed PySpark Glue jobs and Lambda functions for large-scale data transformations processing 5M+ records daily.
- Collaborated with cross-functional analytics and product teams to deliver clean, reliable, and accessible datasets for data-driven decision-making.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed Python and SQL data transformation scripts for pipeline development and ETL workflows.
- Maintained PostgreSQL databases with indexing, query tuning, and schema design for analytics workloads.
- Supported workflow orchestration and monitoring for scheduled data jobs with detailed logging and error handling.
- Demonstrated strong problem-solving and time management skills in a dynamic, fast-paced environment.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

AWS Event Streaming Pipeline: End-to-end pipeline using Kafka, Airflow, PySpark, and Redshift for real-time and batch analytics with automated data quality checks.

Redshift Optimization Initiative: Schema redesign and query tuning project reducing average dashboard load time from 8 minutes to under 2 minutes.
