PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience owning the end-to-end data lifecycle from ingesting raw event streams to building well-modeled, highly reliable datasets for dashboards and analytics. Expert in SQL, ETL/ELT, data warehousing, pipeline observability, and data quality. Strong understanding of normalized vs denormalized data models, Git workflows, and agile development practices.

TECHNICAL SKILLS

Core: SQL, Python, ETL/ELT, Data Warehousing, Data Modeling

Pipeline & Quality: Airflow, dbt concepts, data validation assertions, pipeline observability, cost optimization

Databases: PostgreSQL, MySQL, Amazon Redshift, Snowflake basics

Analytics: Power BI, Streamlit, BI tool integration

DevOps: Git (branching, pull requests, code reviews), Agile/Scrum

Streaming: Kafka, event stream ingestion, third-party API feeds

---

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Owned end-to-end pipeline development and reliability for analytics, personalization, and reporting datasets powering 50+ business dashboards.
- Ingested raw event streams and third-party API feeds into structured data warehouse tables using Python ETL and SQL transformations.
- Designed data warehouse architecture with trade-offs between wide denormalized tables and normalized models for query performance and maintainability.
- Built well-modeled, highly reliable datasets with automated assertions treating silent data failures as critical incidents.
- Implemented pipeline observability with logging, alerting, and row-level data quality checks across 25+ production workflows.
- Optimized data infrastructure for cost efficiency through incremental loads, partition pruning, and storage lifecycle policies.
- Collaborated with product, analytics, and backend engineering teams using Git branching strategies and code review workflows.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed SQL-based ETL pipelines for customer event data and operational reporting.
- Built data warehousing solutions with star-schema models for sales and engagement analytics.
- Maintained data governance practices including schema documentation and pipeline runbooks.
- Supported BI reporting with curated SQL views and Power BI datasets.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

Customer Event Pipeline: Built event ingestion and modeling pipeline for SaaS analytics with SQL ETL, data quality assertions, and BI integration.

Data Warehouse Redesign: Migrated legacy flat tables to optimized star-schema models improving dashboard reliability and query speed by 60%.
