PROFESSIONAL SUMMARY

Data Engineer with 2+ years of hands-on experience building scalable, production-grade data pipelines on AWS with Snowflake and Databricks exposure. Strong Python, PySpark, and advanced SQL skills with proven experience in ETL/ELT using AWS Glue, Step Functions, and streaming ingestion via Kafka and Kinesis. Experienced in Medallion Architecture, automated data quality validation, data contracts, and ML-ready dataset engineering. Ownership mindset with strong documentation habits and cross-functional collaboration across Product, ML, and Analytics teams.

TECHNICAL SKILLS

Languages: Python, PySpark, SQL (advanced)

Platforms: Snowflake, Databricks (familiar), AWS Glue, Step Functions, Lambda

AWS: S3 (data lake), Kinesis, SNS, SQS, Glue, Redshift, IAM

Streaming: Apache Kafka, AWS Kinesis, event-driven architectures, CDC patterns

Data Engineering: Medallion Architecture, dimensional modeling, ETL/ELT, Feature Stores

Storage Formats: Parquet, Delta Lake, Iceberg

Data Quality: Automated testing, data profiling, pipeline validation, schema evolution, observability

Tools: Git, Airflow, Grafana, Debezium (familiar), Fivetran (familiar)

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Built and maintained complex data pipelines using AWS Glue, Step Functions, and Lambda for high-throughput batch and streaming workloads.
- Implemented Medallion Architecture (bronze/silver/gold) on AWS S3 with Parquet and Delta-style layering for scalable data lake engineering.
- Developed real-time ingestion pipelines using Kafka and Kinesis with fault-tolerant consumers, dead-letter queues, and proactive alerting.
- Owned end-to-end data validation and QA by building automated data quality checks directly into ETL/ELT pipelines, reducing bad data propagation by 90%.
- Enforced data contracts and schema evolution guidelines maintaining high data integrity across analytics and ML domains.
- Engineered ML-ready curated datasets supporting downstream data science and analytics teams with documented lineage.
- Optimized storage formats (Parquet) and compute performance on PySpark jobs, reducing batch processing time by 40%.
- Collaborated with Product and ML teams translating architectural designs into functional, production-grade code.
- Maintained strong documentation including playbooks, technical specs, and pipeline runbooks.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed Python and PySpark ETL workflows for large-scale data transformations and warehouse loading.
- Built data profiling and validation scripts ensuring data quality across ingestion and transformation stages.
- Maintained PostgreSQL and cloud data stores with SQL optimization and schema design.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Databricks Fundamentals (in progress)

KEY PROJECTS

AWS Data Lake Platform: Medallion-architecture pipeline on S3 with Glue/Step Functions orchestration, automated QA gates, and Kafka streaming ingestion.

ML-Ready Feature Pipeline: Curated dataset engineering with schema contracts, data profiling, and observability for downstream ML model training.
