---

## PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building scalable, maintainable data pipelines and data models in mission-critical environments. Strong SQL expertise including query optimization, complex transformations, and data modeling. Solid Python skills with hands-on AWS experience (Redshift, Lambda, Glue, S3), Apache Airflow orchestration, dbt transformations, and Kafka real-time streaming. Experienced in cloud migration, data quality, observability, and cross-functional collaboration with product, engineering, and analytics teams.

---

## TECHNICAL SKILLS

**Languages:** Python, SQL (advanced), PySpark

**AWS:** Redshift, S3, Glue, Lambda, IAM, EC2

**Data Engineering:** ETL/ELT, data modeling, incremental loads, cloud migration, pipeline optimization

**Orchestration & Transform:** Apache Airflow, dbt (familiar), Step Functions

**Streaming:** Apache Kafka, real-time event ingestion, fault-tolerant consumers

**Databases:** MySQL, PostgreSQL, Amazon Redshift

**Practices:** Data quality, observability, security, CI/CD, Git

---

## PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

**June 2023 – Present**

- Built and optimized scalable, maintainable data pipelines ingesting high-volume data from MySQL databases, REST APIs, and real-time Kafka streams.
- Designed and maintained performant data models in Amazon Redshift with advanced SQL, distribution keys, and query optimization for analytics workloads.
- Developed 25+ production Airflow DAGs orchestrating daily and hourly ETL workflows with retry logic, monitoring, and alerting.
- Contributed to on-premises to AWS cloud migration, refactoring legacy pipelines into AWS-native Glue and Lambda-based solutions.
- Embedded data quality, reliability, and observability as first-class principles with automated row-count, null, and schema validation checks.
- Implemented Kafka-based streaming ingestion with fault-tolerant consumers and dead-letter queues for real-time event processing.
- Collaborated with cross-functional teams to translate business requirements into robust technical solutions in a fast-paced environment.
- Applied dbt-style transformation patterns for modular, testable data modeling and documentation.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

**January 2022 – May 2023**

- Developed Python and SQL ETL scripts for multi-source ingestion from MySQL and REST APIs with schema validation.
- Maintained MySQL and PostgreSQL databases with indexing, query tuning, and data modeling for analytics workloads.
- Supported data migration initiatives and pipeline documentation for reproducible, auditable workflows.

---

## EDUCATION

**Bachelor of Technology in Computer Science**

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

---

## CERTIFICATIONS

- AWS Certified Cloud Practitioner

---

## KEY PROJECTS

**Payments Data Platform:** End-to-end AWS pipeline with Redshift data models, Airflow orchestration, and Kafka streaming for real-time transaction analytics.

**Cloud Migration Pipeline:** Refactored legacy on-premises ETL into AWS Glue and Lambda workflows with automated data quality gates and observability dashboards.
