---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building and maintaining scalable ETL/ELT pipelines and analytics solutions. Strong advanced SQL, data warehousing, and dimensional modeling skills with hands-on GCP experience including BigQuery, Cloud Storage, Composer, and Pub/Sub. Proficient in Python for data processing and automation. Experienced in data quality, governance, star/snowflake schema design, and delivering curated datasets for reporting, analytics, and AI-driven initiatives.

TECHNICAL SKILLS

Cloud (GCP): BigQuery, Cloud Storage, Cloud Composer (Airflow), Pub/Sub, Dataflow, Cloud Functions

Data Engineering: ETL/ELT pipeline design, data warehousing, dimensional modeling, star/snowflake schemas, data marts

Languages: Python, SQL (advanced)

Data Quality: Schema validation, consistency checks, governance standards, automated quality gates

BI & Analytics: Power BI, Tableau, Looker/LookML (familiar), reporting and dashboard development

Tools: Git, Docker, CI/CD pipelines

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Designed, built, and maintained scalable ETL/ELT pipelines ingesting structured and semi-structured data into cloud data warehouses and analytics platforms.
- Developed dimensional schemas, star/snowflake data models, and data marts supporting reporting, analytics, and downstream AI initiatives.
- Built and optimized BigQuery-compatible analytical datasets with advanced SQL, partitioning, clustering, and cost-efficient query design.
- Implemented Apache Airflow (Cloud Composer patterns) DAGs for orchestrating batch pipelines with retries, monitoring, and alerting.
- Ensured data quality, consistency, and governance through automated validation checks and schema enforcement at ingestion and transformation stages.
- Optimized SQL queries and pipeline performance, reducing report runtime by 60% and cloud processing costs by 35%.
- Partnered with analytics teams and business stakeholders to translate data requirements into technical solutions and curated datasets.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed Python and SQL ETL workflows for relational database integration and warehouse loading.
- Applied dimensional modeling techniques and maintained PostgreSQL databases with query optimization and schema design.
- Supported data migration projects and documentation of pipeline behavior and data lineage.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- GCP BigQuery and data engineering fundamentals (self-study / in progress)

KEY PROJECTS

GCP Analytics Pipeline: Built end-to-end ETL/ELT pipeline using Cloud Storage staging, Python transforms, BigQuery warehouse layers, and automated data quality checks for analytics and reporting.

Dimensional Data Mart: Star-schema data mart design project delivering curated datasets for business intelligence dashboards and AI model training.
