---

## PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building centralized data pipeline architectures, data warehouses, data lakes, and analytics infrastructure on AWS. Strong Python and advanced SQL skills with hands-on experience in large-scale ETL jobs, Kafka event-streaming, Elasticsearch, and cross-functional data delivery. Comfortable performing root cause analysis, optimizing data systems from the ground up, and supporting product and analytics teams in dynamic, fast-paced environments.

---

## TECHNICAL SKILLS

**Languages:** Python, SQL (advanced), PySpark, Bash/Linux

**Data Engineering:** ETL/ELT, data pipeline architecture, data warehousing, data lakes, metadata management

**AWS:** S3, Glue, Lambda, Redshift, EC2, IAM, multi-region data separation

**Streaming & NoSQL:** Apache Kafka, Elasticsearch, event-driven ingestion patterns

**Big Data:** Apache Spark, large-scale dataset assembly, workload and dependency management

**Practices:** Root cause analysis, data transformation processes, cross-functional collaboration, Git

---

## PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

**June 2023 – Present**

- Built and maintained centralized data pipeline architecture processing 5M+ records daily across data warehouse, data lake, and analytics hubs on AWS.
- Assembled large, complex datasets from REST APIs, event streams, CSV/JSON files, and relational sources meeting functional and non-functional business requirements.
- Developed 25+ production ETL/ELT jobs using Python, SQL, and AWS Glue for optimal extraction, transformation, and loading from diverse data sources.
- Built analytics tools and SQL reporting layers providing actionable insights into customer acquisition, operational efficiency, and key business performance metrics.
- Deployed Kafka-based streaming ingestion with fault-tolerant consumers and Elasticsearch indexing for real-time event analytics.
- Ensured data separation and secure access patterns across environments with IAM policies, encryption, and audit logging.
- Created data tools and curated datasets for product and ML teams enabling data-driven product optimization.
- Performed root cause analysis on pipeline failures and data quality issues, identifying improvement opportunities and reducing downtime by 90%.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

**January 2022 – May 2023**

- Developed Python and SQL ETL scripts for multi-source ingestion with schema validation and structured logging.
- Built data transformation processes and metadata documentation for reproducible analytics workflows.
- Maintained PostgreSQL databases with indexing and query tuning in Linux-based development environments.

---

## EDUCATION

**Bachelor of Technology in Computer Science**

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

## CERTIFICATIONS

- AWS Certified Cloud Practitioner

## KEY PROJECTS

**Centralized Data Platform:** End-to-end AWS pipeline architecture with warehouse, lake, and streaming layers supporting cross-functional analytics and product teams.

**Event Analytics Hub:** Kafka + Elasticsearch pipeline with Python consumers delivering real-time operational metrics and customer acquisition insights.
