Sparsh Rawat

Data Engineer | ETL/ELT, Python, SQL, Data Modeling | 2+ Years

Dehradun, Uttarakhand, India | rawat.sparsh@feg.eu | +91-XXXXXXXXXX | linkedin.com/in/spa22 | github.com/Sparsh225

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience owning end-to-end data lifecycles — from ingesting raw event streams and APIs to building well-modeled, reliable datasets for analytics and ML. Strong in Python (Pandas-style scripting), SQL, ETL/ELT pipeline design, dimensional data modeling, data quality assertions, pipeline observability, and CI/CD automation. Experienced in designing for cost efficiency, maintainability, and long-term data warehouse architecture.

TECHNICAL SKILLS

Python | SQL | ETL/ELT | Data Modeling | Dimensional Modeling | Star Schema | Apache Spark | Databricks | Azure Data Factory | Event Hubs | Kafka | Data Quality | Great Expectations | DBT | CI/CD | Git | Data Warehousing | Incremental Loads | Backfills | Pipeline Observability

PROFESSIONAL EXPERIENCE

Associate Data Engineer | Celebal Technologies

August 2024 – Present | Pune, India (Remote/Hybrid)

- Owned end-to-end ETL/ELT pipelines ingesting data from APIs, databases, and event streams into centralized data warehouses.
- Designed dimensional and transactional data models with incremental load strategies and backfill procedures.
- Implemented data quality assertions and validation frameworks treating silent data failures as critical incidents.
- Built modular, well-tested Python and SQL transformation logic with Git-based code review workflows.
- Optimized complex SQL queries for performance and cost efficiency on cloud data warehouse platforms.
- Automated pipeline deployments via CI/CD, ensuring reproducible and maintainable data workflows.
- Collaborated with analytics and product teams to translate business requirements into optimized table structures.

Software Developer Intern | Upraised

May 2024 – August 2024 | Bengaluru, India

- Built frontend data features using React, TypeScript, and GraphQL for recruiter and applicant applications.
- Improved application stability by resolving 50+ bugs and shipping 5 production features.

PROJECTS

- Event-Driven Ingestion Pipeline — Designed CDC-based ingestion with metadata-driven frameworks and data validation gates.

EDUCATION

- Bachelor of Technology, Computer Engineering — DIT University, Dehradun (2020–2024) | CGPA: 8.4

CERTIFICATIONS

- Microsoft Certified: Fabric Data Engineer Associate (DP-700)
- Databricks Certified Data Engineer Associate & Professional
- Databricks Lakehouse Fundamentals | Databricks Generative AI Fundamentals
- Microsoft Azure Data Fundamentals (DP-900) | Azure Fundamentals (AZ-900)
