---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building production ETL/ELT pipelines, analytical data models, and scalable data platform foundations. Proficient in SQL, Python, Apache Airflow, dbt, and modern data warehouses including Snowflake and Amazon Redshift. Strong understanding of Bronze/Silver/Gold architecture, dimensional modeling, data quality, lineage, observability, and PostgreSQL/MySQL schema management for analytics and BI enablement.

TECHNICAL SKILLS

Data Engineering: ETL/ELT pipelines, Bronze/Silver/Gold layers, dimensional modeling, semantic layers, data quality, lineage, observability

Orchestration & Modeling: Apache Airflow, dbt (models, tests, documentation), incremental loads, backfills

Languages: Python, SQL (query optimization, window functions, CTEs)

Data Warehouses: Snowflake, Amazon Redshift, BigQuery, PostgreSQL, MySQL

Streaming: Apache Kafka, event-driven ingestion patterns

DevOps: Git, CI/CD, Docker, monitoring and alerting

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Designed, built, and maintained production ETL/ELT pipelines from operational systems into cloud data warehouses for analytics and BI reporting.
- Implemented Bronze, Silver, and Gold data layers with curated datasets and star-schema models powering executive and operational dashboards.
- Developed dbt-style SQL transformation patterns with automated testing, documentation, and data quality validation across pipeline stages.
- Built and managed 25+ Apache Airflow DAGs for pipeline scheduling, dependency management, retries, and production monitoring.
- Owned PostgreSQL and Redshift schema evolution, incremental load patterns, and database migration support alongside engineering teams.
- Ensured data quality, observability, and governance through row-level checks, schema validation, anomaly alerting, and pipeline SLAs.
- Optimized analytical SQL models and warehouse performance reducing time-to-insight for business stakeholders by 60%.
- Collaborated with product, analytics, and engineering teams to deliver trusted datasets for growth, finance, and product decision-making.
- Contributed to event streaming foundations using Apache Kafka for real-time ingestion supporting future personalization use cases.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Built Python and SQL ETL scripts ingesting data from REST APIs, CSV files, and application databases into analytics stores.
- Managed PostgreSQL and MySQL schemas with migration scripts, indexing, and query tuning for reporting workloads.

- Created SQL views and Power BI dashboards for self-service analytics and business reporting.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

Medallion Data Platform: End-to-end Bronze/Silver/Gold pipeline using Airflow, Python, and Redshift with dbt-style transformations and automated data quality tests.

Analytics Enablement Layer: Built curated semantic datasets and dimensional models supporting self-service BI and executive reporting dashboards.
