---

PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience designing and optimizing ETL/ELT workflows using Databricks, Python, SQL, and PySpark on Azure and AWS cloud platforms. Skilled in building scalable data lakes, data warehouses, and CI/CD-enabled data engineering pipelines. Strong expertise in Apache Spark distributed computing, Git version control, and cross-functional collaboration with data scientists and business stakeholders.

TECHNICAL SKILLS

Core: Python, SQL, PySpark, ETL/ELT, Databricks, Apache Spark

Cloud: Azure (Data Factory, Databricks), AWS (S3, Glue, Redshift), data lakes, cloud-native services

DevOps: Git, CI/CD pipelines, Jenkins, Azure DevOps, version control workflows

Data Platforms: Data warehouses, data pipelines, big data processing frameworks

Visualization: Power BI, Tableau

Tools: Alteryx (exposure), Docker

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Designed, built, and optimized ETL/ELT workflows using Python, SQL, and PySpark for processing large datasets from source to consumption layers.
- Developed and maintained robust, scalable data pipelines on AWS and Azure cloud platforms including data lakes and data warehouse architectures.
- Leveraged Apache Spark for distributed computing and complex data transformations handling 5M+ daily records.
- Used Databricks for big data processing, analytics, and batch data workflows with performance tuning and cluster optimization.
- Created and managed SQL-based data solutions ensuring high availability, scalability, and performance.
- Leveraged CI/CD pipelines to streamline development, testing, and deployment of data engineering workflows.
- Worked with Git and Jenkins for version control and automation across data engineering projects.
- Collaborated with data scientists, analysts, and business stakeholders to deliver impactful data solutions.
- Maintained clear documentation for data workflows, pipelines, and processes.
- Optimized data systems for performance, scalability, and cost-efficiency.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Built ETL pipelines using Python and SQL with focus on data lake ingestion patterns.
- Supported cloud data platform migrations and data warehouse modeling projects.
- Participated in agile development with Git branching, pull requests, and peer code reviews.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Databricks Fundamentals (in progress)

KEY PROJECTS

Cloud ETL Platform: End-to-end ETL/ELT pipeline on AWS with PySpark, Airflow, and Redshift with CI/CD deployment automation.

Databricks Analytics Pipeline: Migrated batch processing jobs to Databricks reducing compute costs by 30% while improving throughput.
