PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building scalable ETL/ELT pipelines, data warehouse solutions, and business intelligence reporting. Proficient in Python, SQL, Power BI, and cloud data platforms. Skilled in developing semantic models, DAX measures, and analysis-ready datasets that power dashboards and stakeholder decision-making. Experienced delivering end-to-end data and BI solutions with strong data modeling and query optimization skills.

TECHNICAL SKILLS

BI & Reporting: Power BI, DAX, Power Query (M), Semantic Modeling, Dashboard Optimization, Power BI Service

Languages: Python, SQL, Java

Data Engineering: ETL/ELT, Apache Airflow, Data Modeling (Star/Snowflake Schema), Data Quality Validation

Databases: PostgreSQL, MySQL, Amazon Redshift, Snowflake

Cloud & Tools: AWS (S3, Glue, Redshift), Git, Docker, Grafana

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Built and maintained scalable ETL/ELT pipelines processing 5M+ records daily, delivering reliable, analysis-ready datasets for business and leadership reporting.
- Developed Power BI dashboards and semantic models using star-schema design, DAX measures, and calculated KPIs for 50+ business users.
- Wrote and optimized complex SQL queries across PostgreSQL and Redshift including window functions, CTEs, and performance tuning reducing report runtime by 75%.
- Used Python for data transformation, automation, and API integrations supporting pipeline development and reporting dataset preparation.
- Implemented automated data quality checks ensuring reporting datasets are refresh-ready with row count assertions, null thresholds, and schema validation.
- Managed Power BI deployments including scheduled refresh, workspace access, and report sharing for cross-functional stakeholders.
- Collaborated with product, engineering, and analytics teams to translate business requirements into optimized data warehouse and lakehouse solutions.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed Python and SQL ETL scripts for data ingestion, transformation, and loading into relational databases.
- Built internal Power BI dashboards and SQL views for sales and operations reporting with dimensional data modeling.
- Maintained PostgreSQL and MySQL databases with indexing, query optimization, and schema design for analytics workloads.
- Participated in code reviews, Git workflows, and agile sprint ceremonies delivering reliable BI solutions.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

Power BI Analytics Platform: End-to-end ETL pipeline with Python, Airflow, and PostgreSQL feeding optimized Power BI semantic models and executive dashboards.

Data Warehouse Optimization: Star-schema redesign and SQL query tuning project reducing average dashboard load time from 8 minutes to under 2 minutes.
