---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience in Python-based data ingestion, web scraping, API integration, and data pipeline automation. Strong proficiency in HTTP request/response cycles, structured and semi-structured data formats (JSON, CSV, SQL/NoSQL), and building parsers for messy PDF, HTML, and JSON sources. Experienced with message queues (Kafka, RabbitMQ), AWS/GCP cloud services, and observability tooling.

TECHNICAL SKILLS

Languages: Python, SQL, Java, Regular Expressions

Data Ingestion: Web scraping, REST API integration, third-party data providers, HTTP auth patterns

Data Formats: JSON, CSV, SQL/NoSQL tables, PDF parsing, HTML parsing

Messaging: RabbitMQ, Apache Kafka, SQS

Cloud: AWS (S3, Lambda, EC2), GCP basics

Search & OCR: Elasticsearch exposure, Tesseract OCR basics

Observability: Grafana, logging, pipeline monitoring

Tools: Git, Docker, maintainable automation scripts

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Scraped and ingested data from external APIs, websites, and third-party data providers using Python automation scripts.
- Scoped new data sources and evaluated integration approaches against existing data architecture and quality standards.
- Cleaned, normalized, and structured raw data for analytics at scale using Python, SQL, and regex-based parsers.
- Built maintainable, well-documented data ingestion pipelines with error handling and retry logic.
- Implemented message queue integrations using Kafka and RabbitMQ for asynchronous data processing workflows.
- Developed parsers to extract usable data from messy PDFs, HTML, JSON, and CSV formats using regular expressions.
- Deployed cloud-based data solutions on AWS including Lambda functions and S3 storage pipelines.
- Set up Grafana dashboards for pipeline observability and data flow monitoring.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Built Python scripts for API data extraction and automated ETL from structured and semi-structured sources.
- Developed web scraping utilities for competitive data collection with rate limiting and auth handling.
- Maintained SQL databases and created normalized data models for downstream analytics.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

Multi-Source Data Ingestion Platform: Python pipeline scraping APIs and websites with regex parsers, Kafka queuing, and PostgreSQL storage.

PDF/HTML Parser Library: Custom Python parsers for unstructured document extraction with OCR fallback using Tesseract.
