PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building scalable, maintainable data pipelines on AWS with strong SQL expertise including query optimization, complex transformations, and data modeling. Proficient in Python for pipeline development with hands-on experience in Redshift, Lambda, Glue, S3, Airflow orchestration, dbt transformations, and Kafka streaming. Collaborative engineer focused on data quality, reliability, observability, and security in mission-critical environments.

TECHNICAL SKILLS

Languages: Python, SQL

AWS: Redshift, Lambda, Glue, S3, IAM, CloudFormation (exposure)

Orchestration: Apache Airflow, Step Functions

Transformation: dbt (models, tests, incremental strategies), ELT/ETL

Streaming: Apache Kafka, event-driven ingestion, real-time data pipelines

Data Modeling: Redshift star/snowflake schemas, query optimization, distribution keys

Principles: Data quality, observability, security, CI/CD (Git, automated testing)

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Built and optimized scalable data pipelines ingesting high-volume data from MySQL databases, APIs, and Kafka streams into Redshift.
- Designed and maintained performant data models in Redshift with optimized SQL queries supporting analytics and reporting workloads.
- Developed dbt-style SQL transformations with tests and documentation for trusted, business-ready datasets.
- Orchestrated 25+ Airflow DAGs for daily and hourly ETL workflows with retry logic, monitoring, and SLA tracking.
- Implemented Kafka-based streaming ingestion with fault-tolerant consumers and dead-letter queues for real-time event data.
- Contributed to cloud migration initiatives moving on-premises workloads to AWS (S3, Glue, Lambda, Redshift).
- Embedded data quality, reliability, and observability as first-class principles with automated validation checks.
- Collaborated with cross-functional teams to translate business requirements into robust technical data solutions.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed Python and SQL ETL scripts for multi-source ingestion with schema validation and error handling.
- Built SQL data models and reporting views for sales and operations analytics.
- Maintained PostgreSQL databases with indexing and query tuning for analytics workloads.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

Payments Data Platform: Redshift + Airflow + dbt pipeline with Kafka streaming ingestion and data quality monitoring.

Cloud Migration ETL: AWS Glue and Lambda pipelines migrating on-premises data to S3/Redshift with validation gates.
