---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building and optimizing modern data pipelines using dbt and Databricks. Skilled in designing scalable ELT/ETL solutions that transform raw data into trusted, business-ready datasets for reporting and analytics. Strong SQL fundamentals, data modeling expertise, and a track record of delivering reliable data transformations in collaborative Data & Analytics teams.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark

Data Transformation: dbt (models, tests, documentation, incremental strategies), ELT/ETL

Platforms: Databricks, Apache Spark, cloud data warehouses

Data Engineering: Pipeline design, data modeling, schema validation, data quality checks

Cloud: AWS (S3, Glue, Redshift), Azure (Databricks exposure)

Tools: Git, Apache Airflow, Docker

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- • Designed, developed, and maintained scalable ELT/ETL solutions using dbt-style SQL transformations and PySpark jobs on Databricks-compatible Spark clusters.
- • Built modular dbt models with tests and documentation transforming raw ingestion data into trusted, business-ready datasets for 50+ BI users.
- • Optimized modern data pipelines processing 5M+ records daily, reducing transformation runtime by 40% through incremental loads and query tuning.
- • Developed PySpark transformations on AWS Glue/Databricks for large-scale data processing with schema enforcement and quality gates.
- • Collaborated with Data & Analytics team to define transformation standards, naming conventions, and reporting-ready data layers.
- • Implemented automated data quality checks (row counts, null thresholds, referential integrity) ensuring reliable reporting datasets.
- • Maintained version-controlled pipeline code with Git, code reviews, and reproducible deployment workflows.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- • Developed Python and SQL ETL scripts for multi-source ingestion with schema validation and error handling.
- • Built SQL transformation layers and reporting views for sales and operations analytics.
- • Maintained PostgreSQL databases with indexing and query tuning for analytics workloads.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Databricks Fundamentals (in progress)

KEY PROJECTS

dbt Analytics Layer: SQL transformation project with modular models, data tests, and documentation powering self-serve BI dashboards.

Databricks ELT Pipeline: PySpark-based pipeline transforming raw event data into curated reporting datasets with quality validation stages.
