PROFESSIONAL SUMMARY

Software/Data Engineer with 2+ years of experience owning cloud-based data platforms and backend systems on AWS. Strong Python development in production environments with hands-on expertise in S3, Lambda, Glue, Athena, and Step Functions. Experienced in building ETL pipelines, backend APIs, data quality validation, and end-to-end platform maintenance with a pragmatic, ownership-driven engineering mindset.

TECHNICAL SKILLS

Languages: Python, SQL

AWS Services: S3, Lambda, Glue, Athena, Step Functions, API Gateway, EC2, IAM

Data Engineering: ETL/ELT pipelines, monthly ingestion workflows, data quality validation, large dataset transformations

Backend: REST APIs, serverless architecture, cloud-based backend services, SFTP ingestion

Tools: Git, Docker, AI-assisted development (Cursor, Copilot), Grafana monitoring

---

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Owned and maintained cloud-based data pipelines and backend systems across the AWS stack processing 5M+ records monthly.
- Ran and supported ingestion workflows using S3, Lambda, Glue, Athena, and Step Functions with automated retry and monitoring.
- Maintained and improved Python codebase, dependencies, and backend services with structured logging and error handling.
- Performed data quality validation, troubleshooting, and issue resolution across ingestion, transformation, and delivery layers.
- Improved API performance and reliability for analytics dashboard delivery with optimized SQL queries and Lambda configurations.
- Integrated third-party data providers and API-based ingestion workflows with schema mapping and validation.
- Used AI-assisted development tools to improve engineering productivity and automate repetitive pipeline tasks.
- Reduced technical debt through code refactoring, dependency updates, and standardized engineering practices.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Built Python ETL scripts and REST API integrations for multi-source data ingestion.
- Developed backend data services and SQL transformations for client-facing reporting platforms.
- Maintained PostgreSQL databases with indexing and query tuning for analytics workloads.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

AWS Serverless Data Platform: S3 + Lambda + Glue + Athena pipeline with Step Functions orchestration and API delivery layer.

Analytics Dashboard Backend: Python API service delivering transformed datasets to client-facing reporting dashboards.
