---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience designing, building, and maintaining scalable AWS data platforms supporting batch and streaming pipelines, analytics, and ML workloads. Strong hands-on expertise in S3, Glue, Lambda, Kinesis, Redshift, Athena, and EMR aligned with AWS Well-Architected best practices. Proficient in Python, SQL, Apache Spark, and Flink with a focus on production-grade, governed data infrastructure.

TECHNICAL SKILLS

AWS Data Services: S3, Glue, Lake Formation, Athena, Redshift, EMR, Lambda, Kinesis/MSK, DynamoDB, IAM

Big Data: Apache Spark, PySpark, Hadoop, Hive, Flink (exposure)

Languages: Python, SQL

Data Engineering: Batch and streaming pipelines, ETL/ELT, data lakehouse, data modeling

Analytics & Search: OpenSearch (exposure), data cataloging, lineage documentation

Tools: Git, Docker, Apache Airflow, Grafana, CloudWatch

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Designed and operated scalable AWS data platforms ingesting APIs, documents, and event streams into S3 with bronze/silver/gold layering.
- Built production batch and streaming pipelines using Glue, Lambda, Kinesis, and Step Functions with fault-tolerant retry and monitoring.
- Developed PySpark transforms on EMR and Glue for large-scale data processing with deterministic, reproducible job configurations.
- Optimized Redshift and Athena queries with distribution keys, partitioning, and schema design reducing report runtime by 75%.
- Implemented automated data quality gates, schema enforcement, and audit logging aligned with governance requirements.
- Deployed Kinesis-based real-time ingestion for low-latency event processing with CloudWatch alerting and observability dashboards.
- Collaborated with analytics and engineering teams across distributed time zones to deliver reliable, analytics-ready datasets.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Built Python ETL scripts for API and file-based ingestion with schema validation and structured logging.
- Maintained PostgreSQL databases with indexing and query optimization for analytics workloads.
- Supported AWS cloud migrations and pipeline documentation for team knowledge sharing.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

AWS Lakehouse Platform: End-to-end S3/Glue/Redshift pipeline with batch and streaming ingestion, quality validation, and analytics consumption.

Streaming Analytics Pipeline: Kinesis + Lambda + S3 architecture with monitoring, alerting, and governed data delivery for real-time dashboards.
