PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building ETL/ELT pipelines, data warehouses, and distributed data systems using Python, SQL, Apache Spark, and Azure. Skilled in evaluating pipeline quality, optimizing data transformations, and applying modern data engineering practices including dbt, CDC, and cloud-native architectures. Regular user of AI coding tools (Cursor, Claude) for accelerated development and code review.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark

Data Engineering: ETL/ELT, Apache Spark, Azure Data Factory, dbt, CDC, Medallion Architecture

Cloud: Microsoft Azure (Databricks, Data Lake, ADF), AWS exposure

Tools: Git, Azure DevOps, Great Expectations, Delta Lake, Unity Catalog

Practices: Data quality validation, pipeline optimization, distributed data systems, CI/CD

PROFESSIONAL EXPERIENCE

Associate Data Engineer | Celebal Technologies | Pune, India

August 2024 – Present

- Built and maintained production ETL/ELT pipelines using Azure Data Factory, Databricks, and PySpark processing large-scale enterprise datasets.
- Implemented Delta Lake lakehouse architecture with Bronze/Silver/Gold medallion layers, Unity Catalog governance, and row/column-level security.
- Developed CDC-based ingestion and metadata-driven pipeline frameworks for reliable batch data movement across Azure Data Lake and curated layers.
- Applied data quality checks using Great Expectations and validation frameworks, reducing silent data failures in downstream analytics.
- Optimized Spark jobs and SQL transformations for performance, cost efficiency, and scalability on Azure Databricks.
- Created dbt models, architecture documentation, and solution proposals; mentored junior engineers on data engineering best practices.
- Contributed to POCs involving Delta Live Tables (DLT), Asset Bundles, and modern lakehouse platform design.
- Experience operating production data platforms with automated validation, monitoring, and fault-tolerant ingestion patterns.
- Proficient in evaluating technical tradeoffs in pipeline design, schema evolution, and incremental load strategies.

Software Developer Intern | Upraised | Bengaluru, India

May 2024 – August 2024

- Delivered production features using React, TypeScript, and GraphQL; resolved 50+ bugs and shipped 5 key product enhancements.
- Worked with data querying patterns via GraphQL/Apollo in a monorepo microfrontend architecture.

EDUCATION

Bachelor of Technology in Computer Engineering

DIT University, Dehradun | 2020 – 2024 | CGPA: 8.4

CERTIFICATIONS

- 5x Microsoft Certified (including Azure Data Engineer Associate DP-203)
- 4x Databricks Certified (Data Engineer, Lakehouse, Fundamentals, Generative AI)
