---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience designing, building, and optimizing scalable data pipelines and cloud data infrastructure. Proficient in Python, SQL, Apache Spark, Kafka, and orchestration tools including Airflow. Experienced in batch and streaming data processing, data modeling, data governance, and delivering reliable datasets for analytics, BI, and ML workflows. Passionate about building data systems that power enterprise digital transformation.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark, Java, Scala (familiar)

Data Engineering: ETL/ELT, Apache Airflow, Apache Kafka, Apache Spark, Flink (familiar), Data Modeling

Cloud Platforms: AWS (S3, Glue, Lambda, Redshift), Azure (Data Factory), GCP (BigQuery)

Databases: PostgreSQL, MySQL, Amazon Redshift, Snowflake, MongoDB

Orchestration: Airflow, Prefect (familiar), Dagster (familiar)

Practices: Data Governance, Data Quality, Git, CI/CD, Agile

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Designed, built, and optimized scalable data pipelines processing 5M+ records daily across batch and streaming workflows for analytics and business intelligence.
- Developed PySpark jobs on AWS Glue for large-scale data transformations with strong foundation in batch and streaming (Kafka, Spark) data processing.
- Built and maintained 25+ production Airflow DAGs orchestrating ETL/ELT pipelines with dependency management, retries, and monitoring for ML-ready datasets.
- Implemented Kafka-based streaming ingestion with fault-tolerant consumers and dead-letter queues for real-time event data pipelines.
- Ensured data quality, validation, and consistency across systems with automated checks including row counts, null thresholds, and schema validation.
- Designed star-schema and dimensional data models supporting enterprise analytics and reporting for 50+ business users.
- Collaborated with analytics and engineering teams on data requirements, data governance standards, and cloud platform optimization.
- Contributed to data infrastructure supporting analytics platforms with focus on reliability, scalability, and compliance.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed Python and SQL ETL scripts integrating data from REST APIs, CSV files, and relational databases into centralized platforms.
- Maintained PostgreSQL and MySQL databases with indexing, query tuning, and schema design for analytics workloads.
- Built internal dashboards using SQL views and Power BI for sales and operations reporting.
- Participated in agile ceremonies, code reviews, and Git branching workflows in a collaborative team environment.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

Enterprise Event Pipeline: End-to-end batch and streaming pipeline using Kafka, Airflow, PySpark, and Redshift with data governance and quality controls.

Cloud Data Platform: Scalable ETL infrastructure on AWS supporting analytics, reporting, and downstream ML feature engineering workflows.
