PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience designing, developing, and maintaining scalable ETL/ELT pipelines on cloud-based data platforms. Strong hands-on skills in Python, PySpark, SQL, and Azure Databricks for high-performance data engineering solutions. Experienced in data migration, modernization, performance optimization, and collaborating with business stakeholders and architects in Agile cross-functional teams.

TECHNICAL SKILLS

Languages: Python, PySpark, SQL, PL/SQL

Azure Data Platform: Azure Databricks, Azure Data Factory, Azure data services

Data Engineering: ETL/ELT frameworks, distributed data processing, data integration, performance tuning

Big Data: Apache Spark, Hadoop, large-scale data migration and modernization

Databases: PostgreSQL, MySQL, SQL Server, data modeling and schema design

Practices: Agile delivery, stakeholder management, engineering best practices, Git, troubleshooting

---

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Designed, developed, and maintained scalable ETL/ELT pipelines and data processing workflows on cloud-based data platforms processing 5M+ records daily.
- Developed high-performance data engineering solutions using Python, PySpark, and SQL ensuring data quality, reliability, and optimized performance.
- Built PySpark jobs on AWS Glue and Databricks-compatible Spark clusters for distributed data transformations and large-scale processing.
- Collaborated with business stakeholders, solution architects, and analytics teams to translate requirements into scalable technical solutions.
- Supported data migration and modernization initiatives including schema evolution, incremental load patterns, and legacy pipeline refactoring.
- Performed performance tuning on Spark jobs and SQL queries, reducing batch processing time by 40%.
- Troubleshot complex data engineering issues and wrote efficient, optimized code for large-scale data processing.
- Followed engineering best practices including code reviews, unit testing patterns, Git workflows, and Agile sprint ceremonies.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed Python and SQL ETL scripts for API and file-based ingestion with schema validation and structured logging.
- Maintained PostgreSQL and MySQL databases with indexing, PL/SQL-style stored procedures, and query optimization.
- Collaborated with cross-functional teams in Agile environment on data integration and reporting solutions.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Databricks Fundamentals (in progress)

KEY PROJECTS

Cloud ETL Modernization: Migrated legacy batch scripts to PySpark-based pipelines with schema validation, performance optimization, and monitoring.

Azure-Ready Data Platform: Designed modular ETL/ELT architecture with Databricks-compatible Spark jobs and SQL transformation layers for analytics workloads.
