---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building production-grade ETL pipelines on AWS with a focus on data quality, reproducibility, and audit-ready lineage. Proficient in Python, SQL, AWS Glue, S3, Lambda, Step Functions, and Kinesis. Experienced in deterministic transforms, schema enforcement, automated validation gates, and medallion-style lakehouse patterns for analytics and AI-ready datasets.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark

AWS Data Services: S3, Glue, Lambda, Step Functions, Kinesis, EC2, IAM

Data Engineering: ETL/ELT, Medallion Architecture, Data Quality Validation, Schema Enforcement, Incremental Loads

Data Quality & Lineage: Automated row-count/null checks, Deequ-style validation, pipeline observability, audit logging

Storage Formats: Parquet, Iceberg (exposure), JSON, CSV

Tools: Git, Docker, Grafana, Apache Airflow

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- • Designed and built production AWS data pipelines ingesting APIs, documents, CSV/JSON sources, and event streams into S3 landing zones with bronze/silver/gold medallion layering.
- • Implemented deterministic Python and PySpark transforms on AWS Glue with reproducible job configs, versioned schemas, and gated data quality stages before downstream consumption.
- • Built automated validation checks (row counts, null thresholds, schema drift detection) reducing bad data propagation by 90% across analytics and ML datasets.
- • Developed Lambda and Step Functions workflows for orchestrated ingestion with retry logic, dead-letter handling, and end-to-end audit trails.
- • Deployed Kinesis-based streaming ingestion for real-time event data with fault-tolerant consumers and monitoring dashboards.
- • Treated data quality as a first-class architectural property — not an afterthought — aligning pipelines with governance and attribution requirements.
- • Collaborated with AI and analytics teams to deliver trusted, agent-ready datasets with documented lineage and access controls.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- • Built Python ETL scripts for API and file-based ingestion with schema validation and structured logging.
- • Maintained PostgreSQL databases with indexing and query optimization for analytics workloads.
- • Supported data normalization and documentation for reproducible, auditable data workflows.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

AWS Lakehouse Pipeline: End-to-end ingestion and ETL on S3/Glue with quality gates, lineage logging, and Parquet storage for analytics and downstream AI use cases.

Streaming Ingestion Platform: Kinesis + Lambda pipeline with validation stages and observability for real-time event processing.
