---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building large-scale data pipelines, dbt transformations, and analytics infrastructure in fast-paced environments. Expert-level SQL skills with hands-on experience in data warehousing (Redshift, Snowflake), dbt modeling, and big data workflow frameworks. Proven track record of creating new data engineering processes, working through ambiguity, and delivering reliable data solutions for data platform and customer-facing analytics teams.

TECHNICAL SKILLS

Languages: Python, SQL (expert-level), PySpark

Data Transformation: dbt (models, tests, documentation), ETL/ELT, incremental loads

Data Warehouses: Amazon Redshift, Snowflake, PostgreSQL, star-schema modeling

Big Data: Apache Spark, large-scale ingestion from diverse sources, workflow orchestration

Cloud: AWS (S3, Glue, Redshift, Lambda), modern data stack tooling

Practices: Pipeline monitoring, data quality, Git, hands-on troubleshooting, agile delivery

---

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- • Built and monitored large-scale data pipelines ingesting data from REST APIs, SaaS sources, flat files, and event streams processing 5M+ records daily.
- • Developed and scaled dbt-style transformation layers with SQL models, tests, and documentation for analytics-ready datasets.
- • Applied expert-level SQL skills to craft optimized queries, materialized views, and warehouse models reducing report runtime by 75%.
- • Worked with data platform and analytics teams to solve customer data problems and deliver trusted business metrics.
- • Created new data engineering processes from scratch including ingestion patterns, transformation standards, and monitoring workflows.
- • Rolled up sleeves to troubleshoot pipeline failures, fix data quality issues, and optimize warehouse performance in a hands-on manner.
- • Designed star-schema and incremental load patterns in Redshift supporting 50+ BI users and data science workloads.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- • Developed Python and SQL ETL scripts for multi-source ingestion with schema validation and error handling.
- • Built SQL transformation layers and reporting views for sales and operations analytics.
- • Maintained PostgreSQL databases with indexing and query tuning for analytics workloads.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

dbt Analytics Layer: SQL transformation project with modular models, data tests, and documentation powering self-serve BI dashboards.

Multi-Source Ingestion Platform: Large-scale pipeline ingesting API and file data into a cloud data warehouse with monitoring, quality checks, and optimized SQL transformations.
