---

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience in data engineering, API integration, and large-scale data processing. Skilled in building and scaling batch and stream-based pipelines using Apache Spark, Kafka, Kinesis, and AWS EMR. Proficient in Python and Java with a focus on well-designed, testable code, unit/integration testing, and reliable ingestion from diverse external data sources.

TECHNICAL SKILLS

Languages: Python, Java, SQL, PySpark

Stream Processing: Apache Spark, Spark Streaming, Kafka, AWS Kinesis, EMR, Flink (exposure)

Data Engineering: ETL/ELT, API integration, web crawling, batch and real-time ingestion, data transformation

Cloud: AWS (S3, Glue, EMR, Lambda, Kinesis), Databricks

Databases: PostgreSQL, MySQL, Amazon Redshift

Practices: Unit testing, integration testing, code reviews, Git, CI/CD

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Built and scaled large-scale data pipelines ingesting data from REST APIs, flat files, and event streams processing 5M+ records daily.
- Developed stream-based data processing at scale using Spark Streaming, Kafka, and AWS Kinesis with fault-tolerant consumers and dead-letter queues.
- Implemented end-to-end Databricks Spark pipelines for ingesting, processing, and transforming structured and unstructured data volumes.
- Wrote well-designed, testable Python and PySpark code with unit and integration tests improving pipeline reliability by 90%.
- Designed robust ETL processes to extract, transform, and load data from diverse sources into analytics-ready datasets.
- Optimized Spark jobs on EMR reducing batch processing time by 40% through partitioning and broadcast join strategies.
- Collaborated with data science and BI teams to deliver curated datasets powering customer growth analytics and dashboards.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed Python ETL scripts for API integration and file-based ingestion with schema validation and error handling.
- Maintained PostgreSQL and MySQL databases with query optimization for analytics workloads.
- Built internal reporting pipelines using SQL views and automated data extraction workflows.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

Multi-Source Ingestion Platform: Scalable pipeline crawling and ingesting data from APIs and files using Python, Spark, and Kafka with testable, modular architecture.

Streaming Analytics Pipeline: Real-time event processing with Kinesis + Spark Streaming delivering low-latency datasets for BI and data science teams.
