PROFESSIONAL SUMMARY

Data Engineer with 2+ years of hands-on experience building and maintaining data pipelines, data models, and analytics infrastructure. Proficient in Python, SQL, Power BI, and DAX with strong foundations in relational databases, data quality, and Git-based workflows. Experienced collaborating with analysts and business stakeholders to deliver reliable datasets, troubleshoot workflows, and support integrated analytics solutions in dynamic business operations environments.

TECHNICAL SKILLS

Languages: Python, SQL, DAX

BI & Analytics: Power BI (semantic models, Power Query, dashboards), SQL views, reporting automation

Data Engineering: ETL/ELT pipelines, data modeling, ingestion, transformation, data quality validation

Databases: PostgreSQL, MySQL, relational database design, indexing, query optimization

Cloud & Platforms: Azure (exposure: Databricks, Fabric), AWS (S3, Glue), API integration

Tools: Git, version control workflows, data documentation, metadata management

---

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Designed, developed, and maintained data pipelines and data models for integrated analytics solutions processing 5M+ records across structured and unstructured sources.
- Supported ingestion, cleaning, transformation, and flow of data from REST APIs, CSV/JSON files, and relational databases into analytics-ready datasets.
- Collaborated with data analysts and business stakeholders to deliver reliable datasets for reporting and operational dashboards.
- Built Power BI dashboards and SQL views reducing manual reporting effort by 60% for 50+ business users.
- Monitored data workflows, troubleshot pipeline failures, and optimized performance cutting average report runtime from 8 minutes to under 2 minutes.
- Ensured downstream data quality and integrity through automated row-count, null, and schema validation checks.
- Maintained data documentation, dictionaries, and metadata supporting data governance and reproducibility.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Assisted in building Python and SQL ETL pipelines for API and file-based data ingestion with schema validation.
- Maintained PostgreSQL and MySQL databases with indexing and query tuning for analytics workloads.
- Built internal Power BI dashboards for sales and operations reporting using DAX measures and optimized SQL queries.
- Participated in Git workflows, code reviews, and agile ceremonies supporting data infrastructure development.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

KEY PROJECTS

Analytics Pipeline & Reporting Platform: End-to-end Python/SQL ETL with Power BI semantic models, DAX calculations, and automated data quality checks for business operations reporting.

API Integration Framework: Reusable Python ingestion modules with Git version control, error handling, and data documentation for cross-team analytics solutions.
