PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience developing and maintaining scalable data pipelines, data integration solutions, and analytics infrastructure. Proficient in Python, SQL, Apache Spark, and Azure data services including Azure Synapse, ADF, and Fabric. Skilled in ETL/ELT design, data quality validation, workflow optimization, and cross-functional collaboration to deliver accurate, secure, and business-ready datasets.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark, Scala (exposure)

Azure Data Stack: Azure Data Factory (ADF), Azure Synapse Analytics, Microsoft Fabric, Azure Data Lake

Data Engineering: ETL/ELT, scalable pipeline design, data integration, batch processing, workflow optimization

Big Data: Apache Spark, data storage and processing at scale

Databases: PostgreSQL, MySQL, SQL Server, relational data modeling

Quality & Practices: Data validation, integrity testing, Git, documentation, agile collaboration

---

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Developed and maintained scalable data pipelines supporting business requirements across 25+ production workflows processing 5M+ records daily.
- Collaborated with cross-functional teams to gather, analyze, and implement data requirements for analytics and product use cases.
- Implemented data integration solutions using Python ETL, PySpark, and Azure-compatible patterns for ingestion and transformation.
- Optimized data processing workflows reducing batch runtime by 40% through partitioning, incremental loads, and query tuning.
- Ensured data quality and integrity through rigorous testing, validation gates, and automated reconciliation checks.
- Built Spark-based transformations for large datasets with schema enforcement and structured logging.
- Supported secure, reliable data flow for decision-making across analytics and operations teams.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Built Python and SQL ETL scripts for API and file-based ingestion with validation and error handling.
- Maintained relational databases with indexing and query optimization for analytics workloads.
- Documented data pipelines and collaborated with analysts to deliver trusted reporting datasets.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner

- Databricks Fundamentals (in progress)

KEY PROJECTS

Azure-Ready ETL Platform: Python and Spark pipelines with ADF-style orchestration patterns, data validation, and optimized transformations for analytics workloads.

Scalable Integration Pipeline: Multi-source data ingestion with SQL and Spark processing, quality checks, and documentation for cross-team data access.
