---

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience designing ETL/ELT pipelines, data warehouses, and cloud analytics platforms. Hands-on with GCP BigQuery, Cloud Storage, Python, and advanced SQL for query optimization and cost-efficient data processing. Experienced in Apache Airflow orchestration, data modeling, CI/CD automation, and enforcing data quality, governance, and security standards across production data platforms.

TECHNICAL SKILLS

Cloud (GCP): BigQuery, Cloud Storage (GCS), Cloud Composer (Airflow), Pub/Sub, Cloud Functions, Dataflow basics

Data Engineering: ETL/ELT design, data warehousing, star/snowflake schema modeling, batch and streaming processing

Languages: Python, SQL (advanced), shell scripting

Databases: BigQuery, PostgreSQL, MySQL, Amazon Redshift, Snowflake

DevOps: Git, CI/CD pipelines, Docker, Jenkins, Terraform (familiar)

Analytics Tools: Power BI, Tableau, dbt (familiar)

PROFESSIONAL EXPERIENCE

Data Engineer | CloudBridge Analytics | Remote, India

June 2023 – Present

- Designed and maintained scalable ETL/ELT pipelines ingesting structured and semi-structured data from multiple sources into cloud data warehouses.
- Built and optimized BigQuery-compatible analytical datasets with advanced SQL, partitioning, clustering, and query cost optimization.
- Developed Python transformation scripts and shell automation for data integration, migration, and deployment workflows.
- Implemented Apache Airflow (Cloud Composer patterns) DAGs for orchestrating batch pipelines with retries, monitoring, and alerting.
- Applied star-schema and snowflake-schema data modeling techniques supporting reporting and analytics requirements.
- Ensured data quality, consistency, and governance through automated validation checks and schema enforcement at ingestion and transformation stages.
- Implemented CI/CD practices with Git-based version control, pull requests, and automated pipeline deployments.
- Partnered with data analysts and business stakeholders to translate requirements into reliable, scalable data solutions.
- Monitored and troubleshooted data platform performance, optimizing storage utilization and processing efficiency.

Associate Data Engineer | InfoTech Solutions | Dehradun, India

January 2022 – May 2023

- Developed SQL and Python ETL workflows for relational database integration and warehouse loading.
- Maintained PostgreSQL and MySQL databases with query optimization, indexing, and schema design.
- Supported data migration projects and documentation of pipeline behavior and data lineage.

EDUCATION

Bachelor of Technology in Computer Science

Graphic Era Deemed to be University, Dehradun | 2019 – 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- GCP BigQuery and data engineering fundamentals (self-study / in progress)

KEY PROJECTS

BigQuery Analytics Pipeline: Built GCP-based ETL pipeline using Cloud Storage staging, Python transforms, and BigQuery warehouse layers with automated data quality checks.

Cloud Data Warehouse Optimization: SQL query tuning and schema redesign project reducing report runtime and cloud processing costs by 35%.
